Please find the completed SSO form for the sewer blockage at 14 Vautrinot Ave. As noted, very difficult to estimate quantity which was minimal. No sewage made it to the storm water drain, as the water evaporated.

Should you have any questions, please contact me.

Aram

Hi Frank,

Thanks for your email. Per the permit conditions, please call and copy me regarding overflow and bypass events of any size.

Thanks, Dave

David – please see email below and the attached ...

I briefly communicated with Dave Burns from DEP ... we will forward you a copy of the completed SSO once done ... I don't believe we had any overflow into any storm drain or water body ... we will confirm ...

RSVP if you need more at this point – thx - frank

Dave

We investigated a “water” leak in the street yesterday Initially we were not sure of it was a water line or a sewer line Further investigation determined it to be a sewer line leaking ... did some jetting/cleaning and found a clogged/damaged sewer ... it is being excavated/repared today and we will follow-up with a SSO form once completed.

Also – should we be copying Dave Turin of EPA for this type of (minor spillage) event?

RSVP if you need more at this point – thx - frank
